

"Our military children are amazing! They are strong, resilient and hard working. And, they struggle. Thank you for supporting our military children; they are often the forgotten heroes of our military. When mothers/fathers are away they count on those within the community to fill the void until they return. Our children depend on you and we--service members and military families--appreciate you."

IMPACT

Understanding the unique challenges facing military children, and the resources available to assist, is essential to meeting their educational needs.

- Approximately two million military children have experienced a parental deployment since 2001.
- The repeated and extended separations and increased hazards of deployment compound stressors in military children's lives.
- NH is a National Guard state--3,000 National Guard families are spread throughout NH communities. How many do you serve?
- National Guard families look within their community for educational services, friendship and support.

Supporting the military child takes a community-wide effort and professional development opportunities to inform helping professionals of the social-emotional challenges military children & families face. Let us help!
